

# Description

This Zenitel IP speaker features a 10W Class D amplifier, powered over PoE. This means that the speaker is capable of delivering more than 120dB, depending on the signal input. The Long Horn Variant increases SPL and directivity. This speaker is best used in environments where speakers must be placed at distance from the intended listener, and installation space is less of a concern.

With IP, the system is able to monitor and address each speaker individually. By moving the amplifier from a central unit out to the speaker itself, the need for a central amplifier unit with conventional speaker loops is eliminated. This makes the system highly scalable, and adding another speaker is easy to do.

Whilst conventional speaker loops are not used, the speakers can still be divided into groups. These zones can now extend over networks or span the Internet. To provide maximum availability, the speaker comes with advanced supervision functions.

The built-in microphone enables intelligent features such as Self-checking, and Automatic Volume Control. It also enhances what is traditionally a broadcast-only medium adding Half Duplex speech, and Ambient Listen functions. Self-checking will detect whether there are any faults in the network or speaker electronics. The status of the speaker is reported to the central unit as well as to 3rd-party management

systems using SNMP or Syslog. The speakers can also be discovered, receive messages, and use Talkback direct to a VMS over ONVIF.

The speaker has a built-in web interface for status information, control, and upgrade. It is easy to install and maintain. In addition, there are possibilities where broadcasts can be logged in detailed reports.

# Specifications

# GENERAL

| Max. sound pressure level at<br>1 meter | 120 dB                                               |
|-----------------------------------------|------------------------------------------------------|
| Max. sound pressure level at 200 meter  | 74 dB                                                |
| Dispersion (-6dB) 1kHz / 4kHz           | 81° / 37°                                            |
| Directivity factor, Q                   | 4,5/9,6                                              |
| Codecs                                  | G.711, G.722                                         |
| Frequency range, G.722<br>Codec         | 200 Hz – 7000 Hz                                     |
| Frequency range (speaker<br>driver)     | 290-8000 Hz                                          |
| Internal speaker amplifier              | 10 W class D                                         |
| Mounting                                | Bracket (included) supporting pole and wall mounting |
| Material / Color                        | ASA (plastic) / RAL 7035 (light<br>grey)             |
| Electronics cover material              | ASA (plastic)                                        |
| Gasket material                         | Silicone rubber                                      |
| IP Rating                               | IP66, tested according to EN<br>60529                |

## ENVIRONMENT AND COMPLIANCES

| Operating temperature range | -40° to 70° C / -40° to 158 ° F |
|-----------------------------|---------------------------------|
| Storage temperature range   | -40° to 70° C / -40° to 158 ° F |
| Relative humidity           | < 95% not condensing            |
| EMC                         | CE and FCC Part 15              |
